GENERAL SUBSCRIBER SERVICES TARIFF

Mountain Rural Telephone  
Cooperative

Section H  
Original Sheet 2

Shared Tenant Service Offerings

H.1 General

(N)

1. In general, Basic Local Exchange service is furnished for the exclusive use of the subscriber, and the subscriber's family, guests, employees, agents, or representatives. Resale of Basic Local Exchange Service is permitted only under the specific conditions described in this Tariff. For the purpose of this Tariff section, "sharing" of Basic Local Exchange Service is considered synonymous with "resale" of Basic Local Exchange Service.

2. When in the judgment of the Company it is deemed necessary or when the projected number of clients is five or more, the customer must apply in writing to resell exchange services provided by the Company and may be required to submit layout maps defining the intended geographic resale area and anticipated development plan in terms of new or existing buildings.

All rates and charges in connection with the resale operation and all repairs and rearrangements behind and including the reseller's communication system will be the responsibility of the reseller (customer of record) owner. The reseller will be single point of contact for all shared tenant services provided in the resale service area. Customers who choose to obtain service directly from the Company may subscribe to any local exchange service available.

Nothing in this Tariff section impairs the Company's franchise or ability to operate in the state. This Tariff is not intended, nor does it, enfranchise or certify the recipients of this service as a telecommunications company.

PUBLIC SERVICE COMMISSION

EFFECTIVE  
JAN 01 1987  
PURSUANT TO 2007 KAR 5:011,  
SECTION 9(1)  
BY: J. Leoghegan

3. Resale is permitted where facilities permit and within the confines of specifically identified continuous property areas under the control of a single owner or within a common development with a single name identity, such as multi-tenant office buildings, apartment complexes, condominium complexes, commercial malls, campus complexes, and office and industrial parks. Areas designated for resale may be intersected or transversing by public thoroughfares provided that the adjacent property segments created by intersecting or transversing thoroughfares would be contiguous in the absence of the thoroughfare. If the designated resale service area is located within the confines of more than one exchange boundary, the serving central office will be determined by the Company. A resale service area may be served by only one central office.

Mountain Rural Telephone  
Cooperative

Section H  
Original Sheet 3

H.1 General (Continued)

4. The premises definition as applies to resale of Basic Local Exchange Service is a resale area as defined by layout maps if appropriate.

(N)

5. Private line services may be provided to tenants of resellers under the rules and regulations specified in this tariff and the Private Line Services Tariff. Resellers may obtain private lines for security purposes such as fire, burglary, etc.

6. Private interconnection of resale service areas within an exchange local calling area and LATA is prohibited. Tie Lines are restricted to the private use of a single resale client and cannot be used to access Local Exchange Service via Sharing and Resale trunks or lines.

7. All other rules and regulations specified in other sections of this Tariff will apply.

H.2 Regulations and Application of Rates

1. Resale of Basic Local Exchange Service is available on a business key system trunk flat rate basis. Other business services will be provided at the rates specified in other sections of this Tariff.

2. The client of the reseller is defined as a different business, firm, corporation, company, subsidiary, association, associate or a residence. Listing for Shared Tenant Service Clients may be obtained under the conditions and rates specified in this Tariff. Charges for Listings will not be separately billed.

3. The service establishment charge shown in H.3 applies for all resale service applications processed under this Tariff and is addition to all other applicable nonrecurring and recurring charges.

4. Whether the tenants included in a resale service area are residence or business, such tenants may be served by the reseller and the same business rates specified in this and other Tariffs will apply to the reseller.

5. The minimum period of service is 36 months with a Service Cancellation Fee (SCF) applicable at the date of termination based on the exchange rates in effect. The Service Cancellation Fee is reduced by 1/36 per month and will be an amount equal to the business rates being billed at the time of termination. A nine month notice is required prior to termination of service by the reseller. If a nine month notice is not received, the reseller will be required to continue to provide service until the Company can provide individual access facilities. But in no case will this requirement extend beyond the nine months from the date the notice of termination is received.

(N)

6. When a subscriber located within the designated resale service area wishes to be directly served by the Company on a non-resale basis, or when Mountain Rural Telephone or customer provided Coin Telephone Service is to be provided in the resale service area, the owner/developer will bear the responsibility for and cost of providing premises access for such services. The owner/developer will make either cable pairs or their equivalents available, or provide facility support (conduit or poles) access to the Company at no charge for provision of these services.

7. The Company will provide facilities to the first point (demarcation/network interface) on the reseller's premises which, in the judgement of the Company is suitable for the location of a network interface. The most economical route from existing network distribution facilities will generally determine the approach used in establishing the point-of-demarcation. The customer may designate an alternate approach route for entrance facilities and additional construction charges specified in this Tariff. The Company will extend the point-of-demarcation to any point designated by the reseller inside his premises at the charges specified in this Tariff. Route selection and location of point-of-demarcation must be in compliance with regulations set forth in other sections of this Tariff and F.C.C. Part 68.

8. All usual and applicable Service Charges and Installation Charges as appropriate indicated in this and other Tariffs applying to the activation, move or change of lines within the sharing and resale offering.

9. Suspension of service as described in this Tariff is not applicable to this service.

10. Transfer of service responsibility between resellers is permitted and will not change the initial service establishment date used to calculate the SCF identified in this section.

GENERAL SUBSCRIBER SERVICES TARIFF

Mountain Rural Telephone  
Cooperative

Section I  
Original Sheet 2

FOREIGN EXCHANGE (FX) SERVICE

I.1 Definition

1. Foreign exchange service is exchange service furnished to a customer from an exchange other than the one from which he would normally be served.

I.2 Regulations

1. Foreign exchange service is not in accord with the general plan of furnishing telephone service and such service is furnished only under special conditions where warranted by the circumstances involved and provided facilities are available.

2. The service is furnished in connection with individual line main station or private branch exchange service only.

3. The service is furnished subject to the same conditions and restriction as to the use of the service by others than the customer and his representatives as applies in connection with other classes of main station service.

4. All negotiations for the establishment of foreign exchange service will be initiated by the prospective customer with the exchange from which he would normally receive service, and the customer will be required to contract for local service in this exchange.

I.3 Conditions

1. When the service involves exchange areas not served by this Company, its establishment will depend on the ability and willingness of the other Company to provide and maintain the required lines and apparatus that fall within its territory.

2. All rates and charges imposed by the other participating Company will be in addition to those that apply to this Company's facilities. All such charges will, however, be paid by the Company and incorporated in the statement issued to the customer so that only one monthly bill will be used for the overall facilities.

BY: J. E. Hill

GENERAL SUBSCRIBER SERVICES TARIFF

Mountain Rural Telephone  
Cooperative

Section I  
Original Sheet 3

3. Miscellaneous service, equipment and facilities used in connection with foreign exchange service are furnished subject to the rates and regulations applying in the foreign exchange from which the customer is served. This also includes service connection, move and change charges.

4. The Company's accepted method for serving subscriber to Foreign Exchange Service, is by use of our Central Office and existing distribution plant. Connection with the foreign exchange will be facilitated by a route from central office to central office. The Company will not provide or permit provision of foreign exchange service by the extension of distribution plant across exchange boundaries.

5. In accordance with PSC order dated 2-21-81, Administrative Case 218 the Company will no longer provide or permit Foreign Exchange Service by extension of local exchange facilities "cross-boundary," the Company, also recognized that it has a responsibility to continue serving existing Foreign Exchange customers served in this manner. Since rates and charges for Foreign Exchange assumes a proper serving method, those "grandfathered" Foreign Exchange customers will be charged Foreign Exchange mileage from their residence to the point of connection with the serving company. Customers who presently have Foreign Exchange service under these arrangements are "grandfathered" only at their existing premise. The Company will deny reestablishing this form of Foreign Exchange if the customer discontinues services, or relocated service to another premise.

6. All Foreign Exchange Service whether terminating in the Companies territory or served solely within its boundaries will require a termination agreement for a period not to exceed six months.

7. Installation charges for Foreign Exchange service are in addition to service charges in Section D.

I.4 Rates and Charges

I.4.1 When an applicant located in an area normally served by this Company request local exchange service privilege through an exchange owned and operated by another Company, the following charges will apply thereto:

1. All charges made by the other Company for the use of its line and facilities, plus \$ .75 per quarter mile measured by airline mile or a fraction thereof, between the territory boundary of the two exchanges to this Company's central office plus the applicable local service rate at this company's central office. The foreign termination will determine this company's local service rate as provided for elsewhere in this tariff.

PREFACE

Effective January, 1, 1983, pursuant to the conditions imposed by the FCC's orders in Docket 20828, any customer premises equipment, as defined by the FCC, offered within this KEY AND PUSHBUTTON TELEPHONE SERVICE Tariff shall be provided by the Company for use with new or existing service only so long as such equipment is available from the Company inventory, except as otherwise permitted by the FCC and the Public Service Commission.

The Company shall continue to provide maintenance for Company provided customer premise equipment subject to the availability of replacement parts and equipment.

The use and provision of Company provided customer equipment remains subject to the regulations of filed tariffs.

# GENERAL SUBSCRIBER SERVICES TARIFF

Mountain Rural Telephone  
Cooperative

Section J  
Original Sheet 3

## KEY AND PUSHBUTTON TELEPHONE SERVICE

### J.1 General

A tariff filing for Key System Equipment is impractical for the following reasons:

1. Each Key System is designed and optional equipment added so that each system is "tailored" to the needs of the individual customer. The variety of applications that are required of the Company, make it virtually impractical to identify a standard installation that subscriber needs require each system to be individually designed.
2. The rapid advancement in technology, and the dramatic increase in the number of vendors of Key System equipment, make a tariff covering each type of similar types, features and custom calling features, also impractical.
3. Introduction of competition whose target is primarily Key System equipment sales, required the Company to be "flexible" in both the leasing and sale of this equipment.
4. Since our prime objective is to provide a reasonable grade of service, at the lowest possible cost to the customer, we believe that tariff flexibility in the area of Key System equipment will allow the Company freedom to locate, and design equipment, and lease it to the customer in the most economical method using state of the art equipment.

### J.2 Key System Contracts

1. It is the policy of the Company to enter into an agreement (contract) with the customer prior to the installation of a Key System, that specifically address all installation due non-recurring charge; and monthly lease charges that would apply to their individual system.
2. In the absence of a specific tariff covering Key System Service offering, it is the policy of the company to retain on file records showing the name of the subscriber, the type of Key System installed, the initial installation charge, the monthly recurring charge, type of termination agreement, and the termination fee schedule, which will be available to the Commission, for review, upon request.
3. The monthly recurring charges specified for the individual customers contract would remain in force for the existence of the contract. Increases in rates unless otherwise specified in the contract, would require a new contract between the Company and the customer.

4. Additional features and/or charges in the equipment as identified by the contract would require a contract

PRIVATE BRANCH EXCHANGE SERVICE

K.1 General

A tariff filing for Private Branch Exchange Equipment is impractical for the following reasons:

1. Each PBX is designed and optional equipment added so that each system is "tailored" to the needs of the individual customer. The variety of applications that are required of the Company, make it virtually impractical to identify a standard installation that subscriber needs require each system to be individually designed.
2. The rapid advancement in technology, and the dramatic increase in the number of vendors of PBX equipment, make a tariff covering each type of similar types, features and custom calling features, also impractical.
3. Introduction of competition whose target is primarily PBX equipment sales, required the Company to be "flexible" in both the leasing and sale of this equipment.
4. Since our prime objective is to provide a reasonable grade of service, at the lowest possible cost to the customer, we believe that tariff flexibility in the area of PBX equipment will allow the Company freedom to locate, and design equipment, and lease it to the customer in the most economical method using state of the art equipment.

K.2 PBX Contracts

1. It is the policy of the Company to enter into an agreement (contract) with the customer prior to the installation of a PBX, that specifically address all installation due non-recurring charge; and monthly lease charges that would apply to their individual system.
2. In the absence of a specific tariff covering PBX Service offering, it is the policy of the company to retain on file records showing the name of the subscriber, the type of PBX installed, the initial installation charge, the monthly recurring charge, type of termination agreement, and the termination fee schedule, which will be available to the Commission, for review, upon request.
3. The monthly recurring charges specified for the individual customers contract would remain in force for the existence of the contract. Increases in rates unless otherwise specified in the contract, would require a new contract between the Company and the customer.

4. Additional features and/or charges in the equipment as identified by the contract would require a contract amendment.

## GENERAL SUBSCRIBER SERVICES TARIFF

Mountain Rural Telephone  
Cooperative

Section L  
Original Sheet 2

### DIRECT INWARD DIALING SERVICE

(N)

#### L.1 GENERAL

DID service permits incoming calls to a PABX or other customer premises equipment from the network to reach a specific station line number without the assistance of an attendant. DID service is provided subject to the availability of facilities and may be furnished from the central office which regularly services the area in which the customer is located or from a foreign central office equipped to provide DID service subject to the appropriate Company intra and inter-exchange rates.

The service includes central office switching equipment necessary for in-dialing from the network directly to station lines associated with customer premises switching equipment.

#### L.2 RULES AND REGULATIONS

Rates are in addition to the rates shown elsewhere in this and other Company tariffs for the services and equipment with which this offering is associated.

The service must be provided on all trunks in a group arranged for inward service. Each trunk group shall be considered a separate service.

Facilities and operational characteristics of interface signals between the Company-provided connecting arrangements and the customer provided switching equipment must conform to the rules and regulations the Company considers necessary to maintain proper standards of service.

One primary directory listing will be furnished without charge for each separate trunk group.

The customer shall be responsible for providing interception of calls to vacant and non working assigned DID numbers by means of attendant interceptor recording announcement service.

DID numbers are provided in blocks consisting of 20 consecutive numbers which may be assigned to station lines or reserved for future use at rates specified herein. The Company does not guarantee to provide specific number blocks. The Company will be responsible for interception and administration of reserved numbers.

The minimum commitment period for the service is three years.. In case of discontinuance or reduction of service within the minimum commitment period, a basic termination charge equal to 36 months of the rates for service terminated reduced by 1/36th for each full month of service provided shall apply.

First Revised Sheet 2

M.1 Off Premise Line

(D)

M.1.1 General

1. Any extension telephone located in another premise than that of the main service or more than 250 feet from the main service if in the same premise, and the Company is requested to provide a line, the telephone shall be considered off premise subject to charges in addition to a regular leased telephone. (T)
2. For the purposes of definition, off-premise line is any line extended off-premise by use of service wire or cable pair, but does not interconnect or "bridge" with other cable pairs in the central office.

M.1.2 Rates

1. Off Premise Extension

Mileage .75 cents per 1/4 mile

M.1.3 Conditions

(O)

1. May be located on the premise of another customer and restricted to answering incoming calls only provided the other has his own separate service at the same location.
2. Business off-premise line may be provided at residence location of the same customer where residence main stations service is also provided.
3. Residence off-premise lines may be provided at a business location of the same customer where business main station service is also provided.
4. Mileage charge will be based upon the route measurement mileage between locations of the telephones.

First Revised Sheet 3

M.2 Joint User Service

M.2.1 General

(D)

Joint use of service permits a person, firm or corporation to share the use of telephone service provided to a business customer.

M.2.2 Rates

Monthly Rate

Joint User of Service  
Rate

33 1/3% of applicable Business  
25% of Residential Rate

M.2.3 Conditions

1. Joint use of service will be furnished with the approval of the Company only with business individual line or PBX trunks.
2. Joint use of service will be furnished to a customer who is in a business of a secretarial nature, or of renting, or leasing space to transient or permanent tenants.
3. The joint user must be located on the premises, or in the same office, or in the same suite of offices as the customer, or in an office adjacent to and directly accessible from the customer's office.
4. A joint user will be furnished one directory listing without a charge.
5. Applications for joint use of service shall be made by the customer.
6. The customer will be responsible for all charges incurred by the joint user.
7. Leased telephones, additional listings and supplemental service may be furnished to the joint user at the regular rates when requested by the customer.
8. After the listing for the joint user has been included in the directory, joint use of service may not be discontinued during the life of the directory, except under the following conditions:

Mountain Rural Telephone  
Cooperative

Section M  
Second Revised Sheet 4

- A. The customer's service is discontinued.
- B. The joint user move from the premise where the customer's service is located.
- C. The joint user establishes his own primary service on the same premises.

M.3 Rotary Line Service

M.3.1 General

Any individual lines arranged for rotary, level hunting or similar service which allows an incoming call to a line that is called to be completed over another line by means of central office equipment will be classed as rotary lines. Lines used as trunks to PBX are not classed as rotary lines. Rotary main service is restricted to a single premises.

M.3.2 Rates

Monthly rate for rotary service per line \$27.75

M.4 Seasonal and Vacation Service

M.4.1 General

Seasonal and Vacation Service is basic local exchange service temporarily suspended at the request of the subscriber. This service is provided to customers in all the Company's exchanges, except key system, PBX and PABX customers.

M.4.2 Rates

1. The monthly rate will be based upon 50% of the customers total Local Exchange Service, including, but not limited to extensions, and directory listing. Service may be suspended for a minimum of 30 days and a maximum of 90 days.
2. Regular service charges will apply for the suspension and subsequent reconnection of service.

Section M  
Third Revised Sheet 5

## M.4.3 Conditions

Seasonal and vacation service will be furnished at the Company's discretion under the following conditions:

1. Service is available to all classes and grades of exchange service where the usage is of a seasonal nature.
2. During the period when the customer is billed at the reduced rate, no installation, moves, changes or maintenance will be provided by the Company.

## M.5 Touch-tone-Pushbutton Telephone Service

### M.5.1 General

1. Touch-tone telephone service provides for the origination of telephone calls through the use of pushbutton in lieu of a rotary dial.
2. The service is furnished with all grades of central office lines.
3. Touch-tone and rotary dial instruments can both be used on a subscriber line, however touch tone instruments cannot be used on a rotary line.
4. Touch-tone telephone service can be provided to all exchanges.

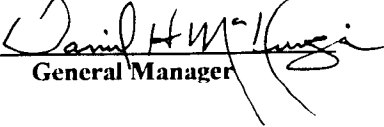

### M.5.2 Rates

The rate for touch tone service is included in the local exchange service rate. See section C.1.

## M.6 911 Emergency Calling Services

### M.6.1 General

1. This service provides the capability of routing emergency calls to a designated Emergency Service Bureau (ESB). The calling party originates the call by dialing 911.
2. Forced Disconnect – The attendant at the ESB will be able to release the connection regardless of the action of the calling party.
3. Disconnect Tone – The attendant at the ESB will be able to readily determine that the calling party is still connected when the call is answered. This is accomplished by providing a tone to the ESB upon answering an abandoned call.
4. Called Party Hold – The ESB will be able to hold the established connection regardless of the action of the calling party.
5. Switchhook Status – The ESB will be able to determine if the calling subscriber has gone on-hook after a connection has been established to the ESB. This is accomplished by providing a tone to the ESB if the subscriber goes on-hook.
6. ESB Ringback – The ESB will be able to hold a subscriber line open and ring the phone back if the part has gone on-hook o provide receiver off-hook tone (ROH) if the subscriber has gone away from an off-hook handset.
7. This service is available in all exchanges and to all subscribers.

### M.6.2 Rates

1. Monthly rate for each 911 line .....\$ 7.60

### M.6.3 Conditions

1. The above equipment and features will be provided only to a 911 ESB sponsored by the appropriate city or county government.
2. This tariff section does not include the cable pair necessary to connect the ESB to the service central office. The necessary cable pair must be ordered using Section T.3 of this tariff.
3. The service described by this tariff section cannot be provided to more than one ESB in the same exchange; however, more than one exchange can be made to access the same ESB.

## M.7 Custom Calling Features

### M.7.1 General

1. Call Waiting  
Provides the user, busy on a call, with a private signal which alerts him to an unanswered call waiting to be completed to his number. The user may, then, hold the existing call, answer the incoming call and alternately talk on both calls until one has been terminated
2. Call Forwarding  
Provides for transferring incoming calls to another telephone number by dialing a code and the telephone number of the service to which calls are to be transferred.
3. Three-Way Calling  
Permits an existing call to be held, and by dialing, a second telephone call can be established and added to the connection. Two toll points may be connected on a Three-Way Calling.
4. Speed Calling  
Provides for the calling of a 7 or 10 digit telephone number by dialing an abbreviated code. The arrangement available has an eight (8-code) and thirty (30-code) number capacity.

### M.7.2 Rates

#### Individual Features

	<u>Residence</u>	<u>Business</u>
(1) Call Waiting	2.50	3.50
(2) Call Forwarding	1.75	2.50
(3) Three-Way Calling	3.25	4.00
(4) Speed Calling (8 Code)	1.50	2.25
(5) Speed Calling (30 Code)	-	10.00

#### Feature Packages

(6) Call Waiting, Call Forwarding, Speed Calling (8 Code), Three-Way Calling	7.00
(7) Call Waiting, Call Forwarding, Speed Calling (8 Code)	4.50
(8) Call Waiting, Call Forwarding	3.75
(9) Call Forwarding, Speed Calling (8 Code)	3.50

### M.7.3 Conditions

- (1) The services are limited to those served by central offices arranged for Custom Calling Services.
- (2) The services are furnished only in connection with individual line service excluding Semi-Public telephone service.

## N.1 Regulations

Customer-provided communications systems may be used with the facilities furnished by the Company for telecommunications services as provided in this tariff. In all such cases the customer-provided communications systems will be constructed, maintained and operated as to work satisfactorily with the facilities of the Company, and to meet all published standards of the Federal Communications Commission (FCC).

Subscribers may not disconnect or remove or permit others to disconnect or remove any apparatus installed by the Company, except upon the consent of the Company.

Where telecommunications service is available under this tariff for use in connection with customer-provided communications systems, the operating characteristics of such equipment or system shall be such as not to interfere with any of the service offered by the Company. Such use is subject to the further provision that the customer-provided equipment or system does not endanger the safety of Company employees or the public; damage, require change in or alteration of, the equipment or other facilities of the Company; interfere with the proper functioning of such equipment or facilities; impair the operation of the Company's service. Upon notice from the Company that the customer-provided equipment or system is causing or is likely to cause such hazard to interference, the customer shall make such change as shall be necessary to remove or prevent such hazard or interference. The customer shall be responsible for the payment of Company charge in Section D, "Maintenance of Service Charge," for visits by the Company to the customer's premises where a service difficulty or trouble report results from customer-provided equipment or system.

The Company shall not be responsible for the installation, operation or maintenance of any customer-provided communications systems. Telecommunications service is not represented as adapted to the use of customer-provided equipment or systems and where such are connected to the Company facilities the responsibility for telecommunications service and to the maintenance and operation of such facilities in a manner proper for such telecommunications service; subject to this responsibility, the Company shall not be responsible for (1) the through transmission of signals generated by the customer-provided equipment or systems or for the quality of, or defects in, such transmission, or (2) the reception of signals by customer-provided equipment or system.

By:

General Manager

Issued under the authority K.P.S.C. No. 7960 dated February 20, 1981

GENERAL SUBSCRIBER SERVICES TARIFF

Mountain Rural Telephone  
Cooperative

Section N  
Original Sheet 3

The Company shall not be responsible to the customer if changes in the criteria outlined herein or in any of the facilities, or procedures of the Company render any customer-provided equipment or communications systems inoperable or otherwise affect its use or performance.

The Company will not be responsible for any loss or damage, nor for any impairment or failure of the service, arising from or connection with the use of facilities of customers and not caused solely by the negligence of the Company.

Where any customer-provided equipment or system is used with telecommunications service in violation of any of the provisions in this tariff, the Company will take such immediate action as necessary for the protection of its services, and will promptly notify the customer of the violation. The customer shall discontinue such use of the equipment or system or correct the violation and shall confirm in writing to the Company within 10 days, following the receipt of written notice from the Company, that such has ceased or that the violation has been corrected. Failure of the customer to discontinue such use or to correct the violation and to give the required written confirmation to the Company within the time stated above shall result in termination of the customer's service.

Customer-provided systems which serve a location which the Company considers impracticable to serve because of hazard of inaccessibility may be connected with telecommunications service by means of connecting equipment furnished by the Company.

The customer indemnifies and saves the Company harmless against claims for infringements of patents arising from combining such equipment or system with, or using it in connection with, facilities of the Company; and against all other claims arising out of any act or omissions of the customer in connection with facilities provided by the Company.

No equipment, apparatus, circuit or device not furnished by the Company shall be attached to or connected with the facilities furnished by the Company, except as provided in this Tariff. In case unauthorized attachments or connections are made, the Company shall have the right to remove or disconnect the same; or to suspend the service during the continuance of said attachments or connection; or to terminate service.

N.2 Network Protection Criteria

PUBLIC SERVICE COMMISSION  
OF KENTUCKY

To protect the telecommunications network and the services ~~EFFECTIVE~~ to the general public by the Company from harmful effects, the signal from the customer-provided communications system to the local exchange

Section N  
Original Sheet 4

message telecommunications network must comply with the following minimum network protection criteria;

1. Where the customer-provided communications system is connected, the customer-provided communications systems must comply with the following criteria:

A. To prevent excessive noise and crosstalk in the network it is necessary that the power of the signal at the central office not exceed 12 db below one milliwatt when averaged over any three second interval. To permit each customer, independent of distance from the central office, to supply signal power which approximates the 12 db below one milliwatt limit at the central office, the power of the signal which may be applied by the customer-provided equipment located on the customer's premises will be specified for each customer's location, but in no case shall it exceed one milliwatt.

B. To protect other services it is necessary that the signal which is applied by the customer-provided equipment located on the customer's premises meets the following limits:

a. The power in the band from 3,995 Hertz to 4,005 Hertz shall be at least 18 db below the power of the signal as specified in N.2.1.1.

b. The power in the band from 4,000 Hertz to 10,000 Hertz shall not exceed 16 db below one milliwatt.

c. The power in the band from 10,000 Hertz to 25,000 Hertz shall not exceed 24 db below one milliwatt.

d. The power in the band from 25,000 Hertz to 40,000 Hertz shall not exceed 24 db below one milliwatt.

e. The power in the band above 40,000 Hertz shall not exceed 50 db below one milliwatt.

C. To prevent the interruption or disconnection of a call, or interference with network control signaling, it is necessary that the signal applied by the customer-provided equipment located on the customer's premises at no time has energy solely in the 2450 to 2750 Hertz band, it must be exceed the power present at the same time in 800 to 2450 Hertz band.

2. Where the customer-provided communications system is connected, the customer-provided communication system must comply with the following criteria:

Issued under the authority K.P.S.C. No. 7960 dated February 20, 1981

GENERAL SUBSCRIBER SERVICES TARIFF

Mountain Rural Telephone  
Cooperative

Section N  
Original Sheet 5

A. To prevent excessive noise and crosstalk in the network it is necessary that the power of the signal which is applied by the customer-provided equipment located on the customer's premises be limited so that the signal power at the output of the network control signaling unit (i.e., at the input of the Company line) does not exceed 9 db below one milliwatt when averaged over any three second interval.

B. To protect other services it is necessary that the signal which is applied by the customer-provided equipment located on the customer's premises meet the following limits at the output of the network control signaling unit (i.e., at the input to the Company line):

a. The power in the band from 3,995 Hertz to 4,0005 Hertz shall be at least 18 db below the power of the signal as specified above in N.2.2.1.

b. The power in the band from 4,000 Hertz to 10,000 Hertz shall not exceed 16 db below one milliwatt.

c. The power in the band form 10,000 Hertz to 25,000 Hertz shall not exceed 24 db below one milliwatt.

d. The power in the band from 25,000 Hertz to 40,000 Hertz shall not exceed 36 db below one milliwatt.

e. The power in the band above 40,000 Hertz shall not exceed 50 db below one milliwatt.

C. To prevent the interruption or disconnection of a call, it is necessary that the signal applied by the customer-provided equipment located on the customer's premises be limited so that the signal at the input to the Company line shall at no time have energy solely in the 2450 to 2750 Hertz band. If there is signal power in the 2450 to 2750 band, it must not exceed that power present at the same time in the 800 to 2450 Hertz band.

N.3 Customer-Provided Communications Systems

Customer-provided systems may be connected, at a service point of the customer, on a voice grade basis with telecommunications service furnished by the Company, through customer-provided equipment which affects such connections externally to the a Company by means of physical connection for transmitting and/or receiving. The customer-provided system shall comply with the minimum work protection criteria contained in N.2.2 and N.2.3.

Eighth Revised Sheet 2

### TELECOMMUNICATIONS RELAY SERVICE/TELECOMMUNICATIONS ACCESS PROGRAM FOR INDIVIDUALS WITH HEARING AND/OR SPEECH DISABILITIES IN KENTUCKY

(T)

#### 0.1 REGULATION

The Kentucky Public Service commission approved a program Telecommunications Relay Service ("TRS") and Telecommunications Access Program ("TAP") pursuant to KRS 278.548, KRS 163.525 and KRS 278.5499. This service provides telephone communications between individuals with hearing and/or speech disabilities who use the telecommunications access program ("TAP") and all customers who use standard voice telephones.

The Kentucky Telecommunications Relay Service will operate twenty-four hours a day, seven days a week. Customers can access the center using toll-free numbers.

To launch the service, the Kentucky Public Service Commission ordered all telephone companies in Kentucky to collect a monthly surcharge from their customers, beginning July 1, 1991 for ("TRS") and on or after March 15, 1995 for ("TAP").

The ("TAP") program was established by the above mentioned legislation to provide the customer premise equipment commonly known as ("TDD") to Kentucky telephone subscribers which have a proven need for this equipment.

(T)

#### 0.2 RATE

The amount of the surcharge for ("TRS") is .07 cents per month per access line and the surcharge of ("TAP") is .02 cents per month per access line. Local rates, if any, will apply. Long distance calls will be charges as normal. Long distance calls will be rated from the originating point to the terminating point of the call.

(C)

(C)

#### 0.3 ACCESS LINE

For purposes of application of this surcharge, access lines are defined as facilities which provide access to and from the telecommunications network for toll service and for local calling with the exception of Public Coin. WATS, Remote Call Forwarding, Radio Common Carriers, InterLATA Foreign Exchange Lines, Private Line Services, Mobile, Other Common Carriers and Mountain Rural Telephone Official Accounts.

TELECOMMUNICATIONS RELAY SERVICE/TELECOMMUNICATIONS ACCESS PROGRAM FOR (T)  
INDIVIDUALS WITH HEARING AND/OR SPEECH DISABILITIES IN KENTUCKY (T)

(continued)

### 0.4 BILLING PHASE

The .09 cents TRS and TAP surcharge shall be identified as a one-time item on customer bills as follows: (C)

KY TELECOM RELAY/TAP (T)

### 0.5 CALLS TO WHICH TRS/TAP APPLY

TRS/TAP shall be available state-wide and interstate for all relay center calls originating or terminating within Kentucky, and shall include interstate calls.

The TRS/TAP will handle most calls normally handled over the regular telephone network (with the exception of 700, 900, and 967 type calls). These include calls that are direct dialed, billed to a third number, collect, person to person, AT&T, and LEC calling cards.

PURSUANT TO 807 KAR 5:011,  
SECTION 9 (1)  
BY:   
SECRETARY OF THE COMMISSION

CUSTOM LOCAL AREA SIGNALING SERVICES

A. APPLICATION OF TARIFF

(N)

1. Custom Local Area Signaling Services (CLASS) is a set of features that employs the CCS7 network. These features are available on single party residential and business lines as station options. CLASS transfers user information with each call and relies heavily on subscriber interaction. Each of the CLASS features is activated and deactivated by dialing a special access code.
2. CLASS services are optional services offered in addition to regular exchange service to those subscribers served by central offices so arranged to provide such services. The number of CLASS service features available depends upon the type of exchange central office providing the service and is subject to the availability of facilities.

B. DEFINITIONS of FEATURE OFFERINGS

1. Automatic Call Back (ACB)

Automatic Call Back is an outgoing management feature which will enable the subscriber to cause the system to redial the last number called from his/her station. When the subscriber dials the ACB activation code, the switch retrieves the last directory number dialed by the subscriber (except directory numbers for operator assisted calls, directory assistance calls and access codes). This will apply regardless of whether the original call was answered, unanswered or encountered a busy tone.

Up to thirty ACB requests can be queued for each subscriber. A request is removed from the queue either when the switch places a call to the called party or when the monitoring period for the request expires.

The system will monitor the calling and called lines and will attempt to connect the call for up to thirty minutes. When both stations are idle, the switch applies distinctive ringing to the calling party's line. The activation of the feature can be cancelled by the customer when desired.

SECTION 9 (1)  
BY:   
FOR THE PUBLIC SERVICE COMMISSION

CUSTOM LOCAL AREA SIGNALING SERVICES

B. DEFINITIONS of FEATURE OFFERINGS (continued)

(N)

2. Automatic Recall (AR)

Automatic Recall is an incoming call management feature which will enable a subscriber to have call set-up performed automatically to the calling party of the last incoming call. This will apply whether the incoming call was answered, unanswered or encountered a busy tone.

Two-level feature activation applies to AR and allows the subscriber to hear the number of the last incoming call prior to deciding whether or not to re-call that number.

3. Calling Number Delivery (CND)

Calling Number Delivery is a terminating CLASS feature which will enable the customer to receive the calling party's ten digit directory number and the time and date on incoming calls. In the case that the call to the CND subscriber is an interoffice call, the calling number must be made available to the CND subscribers switch by the CCS7 network.

The number will be delivered to the called party's Customer Premise Equipment (CPE) in the interval between the first and second ring. The calling number will remain for the duration of the call and can be viewed from the display on the Customer Premise Equipment (CPE).

Any customer subscribing to CND will be responsible for the provision of a display device which will be located on the customer's premise. The installation, repair and technical capability of that equipment to function in conjunction with the feature specified herein will be the responsibility of the customer. The Company assumes no liability and will be held harmless for any incompatibility of this equipment to perform satisfactorily with the network features described herein.

If the incoming call originates from a multi-line group, the telephone number transmitted will always be the main number of the hunt group unless the calling number is Telephone Number (TN) identified within the group.

CUSTOM LOCAL AREA SIGNALING SERVICES

B. DEFINITIONS of FEATURE OFFERINGS (continued)

(N)

3. Calling Number Delivery (continued)

CND is not available on operator handled calls. CND may not be available on all calls outside of the Company serving area.

4. Calling Number Delivery Blocking (CNDB)

a. Calling Number Delivery Blocking - Per Call

Calling Number Delivery Blocking is an originating CLASS feature which provides the capability to the calling party to suppress his/her directory number so that the called party with Calling Number Delivery does not receive the information. The called party will receive a "private" message instead of the calling party's directory number.

CNB allows the subscriber to temporarily change the status of his/her line suppression status on a per-call basis. CNBD is made available to all subscribers on an office-wide basis without presubscription.

b. Calling Number Delivery Blocking - Per Line

This number Suppression (SUPR) feature enables a subscriber to make all calls with the delivery of their calling number marked as "private". The feature is applicable on all outgoing calls placed from the subscriber's line; however, if the preassigned activation code for Calling Number Delivery Blocking - Per Call is dialed on the line, the calling number may be delivered.

This service is only available upon request to the following entities and their employees/volunteers, for lines over which the official business of the agency is conducted including those at the residences of employees/volunteers where the head of the agency certifies to Telephone Company management a need for blocking upon health and safety concerns: (a) Non-profit, tax exempt, private and public social welfare agencies such as domestic violence intervention agencies, (b) federal, state and local law enforcement agencies.

(N)

SECTION 9(1)  
BY:   
FOR THE PUBLIC SERVICE COMMISSION

CUSTOM LOCAL AREA SIGNALING SERVICES

B. DEFINITIONS of FEATURE OFFERINGS (continued)

(N)

4. Calling Number Delivery Blocking (continued)

b. Calling Number Delivery Blocking - Per Line (continued)

Operator services and 9-1-1 service takes precedence over Calling Number Delivery Blocking - Per Call and Per Line service with all calling numbers available regardless of the privacy status.

Although the caller's directory number can be blocked from display by CNDB Per call or Per Line, the directory number is still transmitted to the terminating CLASS end office. Therefore, the called party (if CLASS subscriber) can still use the Automatic Recall, Customer Originated Trace and CLASS screening features against the calling party.

5. Calling Name/Number Delivery (CNAM)

Calling Name Delivery displays the name and ten digit telephone number associated with an incoming call as well as the date and time on the telephone set or adjunct unit after the first ringing cycle. The first fifteen characters of the customer's name will be displayed, beginning with the last name. This service will be offered in conjunction with Calling Number Delivery. Name/Number display allows the subscriber to answer the call with a personalized greeting. With this service, the subscriber has more specific information upon which to base the decision to answer or not.

CNAM requires a telephone set or an adjunct to the set, capable of displaying an alphanumeric set of characters.

Any customer subscribing to any of the services that requires a display device or any adjunct piece of equipment which will be located on the customer's premise, will be responsible for that equipment. The installation, repair and technical capability of that equipment to function in conjunction with these features specified herein will be the responsibility of the customer. The company assumes no reliability and will be held harmless for any incompatibility of this equipment to perform satisfactorily with the network features described herein.

CLASS subscriber) can still use the Automatic Recall, Customer Originated Trace and CLASS screening features against the calling party.

7. Calling Identity Delivery and Suppression (CIDS)

For Subscriber convenience, Calling Identity Delivery and Suppression (CIDS) lets the subscriber determine whether calling name and number will be delivered within a specific call. When the CNND access code is entered followed by a valid directory number, the privacy status for the calling party name and number is marked "public" and the calling name and number are delivered to the terminating party. When the CNNB access code is entered followed by a valid directory number, the privacy status for the calling party name and number is marked "private" and a "P" is delivered to the terminating party.

a. Calling Identity Delivery and Suppression Blocking - Per Call

SIDS allows the subscriber to temporarily change the status of his/her line suppression status on a per-call basis. SIDS is made available to all subscribers on an office-wide basis without presubscription.

b. Calling Identity Delivery and Suppression - Per Line

This feature is applicable on all outgoing calls placed from the subscriber's line; however if the preassigned activation code for Calling Number Delivery Blocking - Per Call is dialed on the line, the calling number may be delivered.

7. Calling Identity Delivery and Suppression (CNAB) (continued)

b. Calling Identity Delivery and Suppression - Per Line (continued)

This service is only available upon request to the following entities and their employees/volunteers, for lines over which the official business of the agency is conducted including those at the residences of the employees/volunteers where the head of the agency certifies to Telephone Company management a need for blocking upon health and safety concerns: (a) Non-profit, tax exempt, private and public social welfare agencies such as domestic violence intervention agencies, (b) federal, state and local law enforcement agencies.

8. Customer Originated Trace (COT)

Customer Originated Trace will allow the subscriber to initiate a trace on the last incoming call by dialing an activation code. The call will be traced automatically, and the print out of the originating directory number along with the time the call was made will be forwarded to the Company's Annoyance Call Bureau. The customer using this feature would be required to contact their servicing law enforcement agency and have presented to the Telephone Company a District Court order authorizing results of traces initiated by the customer to be released directly to the proper authorities for legal handling. There will be an additional charge to the customer for each Annoyance Call Report provided. The customer acknowledges their understanding that under no circumstances will trace results be provided directly to the customer. Some calls that are out of the Company's serving area may not be traceable.

9. Selective Distinctive Ringing/Call Waiting (SDR)

Selective Distinctive Ringing/Call Waiting is an incoming call management feature which will allow the subscriber to define a list of up to thirty-two calling directory numbers that will provide the subscriber with special incoming call treatment. Any incoming calls on this list will be indicated by a distinctive ringing pattern or a distinctive Call Waiting tone, if applicable.

B. DEFINITIONS of FEATURE OFFERINGS (continued)

(N)

9. Selective Distinctive Ringing/Call Waiting (SDR) (continued)

Terminating calls from telephone numbers which are not on the list, or which cannot be identified, will be given standard treatment.

10. Selective Call Acceptance (SCA)

Selective Call Acceptance will allow customers to define a list of calling directory numbers that will be accepted. Any calling numbers not on that list will be routed to announcements and rejected. The calling party not on the acceptance list will receive an announcement stating that the call is not presently being accepted by the called party. Thirty-two directory numbers can be stored in the SCA list. Subscribers can review and change the list of accepted directory numbers as desired. Terminating calls from telephone numbers, which cannot be identified or have been indicated on the list will be given standard terminating treatment.

11. Selective Call Forwarding (SCF)

Selective Call Forwarding will allow the subscriber to have certain terminating calls forwarded to a designated remote station. The activity will occur whenever a call is received from a telephone number which has been indicated on a list of numbers, referred to as the Selective Call Forwarding Screening list. Terminating calls from telephone numbers, which cannot be identified or have not been indicated on the list will be given standard terminating treatment.

12. Selective Call Rejection (SCR)

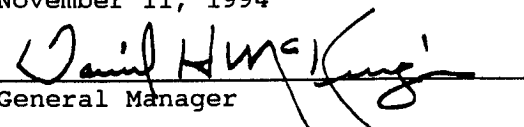

Selective Call Rejection will allow the subscriber to define a list of calling directory numbers to be screened. Any calling number on this list will be routed to announcements and rejected. All other calls will be treated normally. The calling party on the rejection list will receive an announcement stating the call is not presently being accepted by the called party. Thirty-two directory numbers can be stored in the SCR list. Terminating calls from telephone numbers, which cannot be identified or have not been indicated on the list will be given standard terminating treatment.

CUSTOM LOCAL AREA SIGNALING SERVICES

B. DEFINITIONS of FEATURE OFFERINGS (continued)

(N)

13. Anonymous Call Rejection

This feature allows subscribers with or without Calling Number Delivery and/or Calling Name Delivery to reject calls for which the caller has intentionally blocked Calling Name/Number Delivery information.

If the display information is not available due to network restrictions or any other reasons, the receiving CPE (telephone or adjunct), if equipped, is presented with a message to indicate the unavailability of the calling information.

Rejected calls are sent to a telephone company-supplied announcement that informs the calling party why the call was rejected. Anonymous Call Rejection can be overridden by an operator in case of an emergency.

14. Local Data Base Service (LDBS)

Local Data Base Service offers subscribers protection against unauthorized 900 and other toll calls placed from their telephones, and allows name-based dialing without additional customer premises equipment.

LDBS feature provides four originating call control features that can be made available to any subscriber with a touchtone phone. All features work with a four-digit Personal Identification Number (PIN) that subscribers can change from their phones at any time. If a subscriber buys one feature and later buys others, the same PIN can be used for the additional features.

The four features provided by LDBS are:

- a. 900 RESTRICTION allows subscribers to control the access to 900 numbers from their phone keypad. All 900 numbers can be restricted or allowed by entering an activation/deactivation code which includes the subscriber's PIN. A list of 900 NXX codes can also be restricted or allowed.

CUSTOM LOCAL AREA SIGNALING SERVICES

B. DEFINITIONS OF FEATURE OFFERINGS (Continued)

14. Local Data Base Service (LDBS)

- a. Super Speed Calling allows subscribers to store a four-digit speed dialing list in the LDBS. The name (four letters) instead of the entire directory number of the called party can be entered from the keypad. This feature is not compatible with One-Plus Per Call Restriction.
- b. ONE-PLUS PER CALL RESTRICTION requires a PIN to be dialed before any toll call can be completed. Once the PIN has been validated by the LDBS, dial tone is returned to the subscriber and dialing can continue. This feature allows subscribers to control billable calls originating from their phone by requiring the PIN to be dialed with each toll call. This feature is not compatible with Super Speed Calling.
- c. ONE-PLUS BULK RESTRICTION allows subscribers to turn toll dialing capability on or off from their phone by dialing an activation/deactivation code which includes the PIN.

15. Free Number Terminating (FNT)

Free Number Terminating is a terminating Call Management Service that allows local coin and message rate calls to terminate to a directory number free of charge. This service is only available upon request to the following entities and their employees/volunteers, for lines over which the official business of the agency is conducted including those at the residences of employees/volunteers where the head of the agency certifies to Telephone Company management a need for free termination upon health and safety concerns: (a) Non-profit, tax exempt, private and public social welfare agencies such as domestic violence intervention agencies, (b) federal, state, local law enforcement agencies and 9-1-1 service bureaus.

16. Directory Number Hunt (DNH)

Directory Number Hunt is the selection process associated with Hunt Groups. Hunting starts at a particular line or directory number and continues in a fixed sequence (as defined by successive lines or directory numbers in the hunt group) until a line in the idle state is found or the hunt arrives at the end of the sequence. The starting point and the end of the fixed sequence is defined by specifying one of the following options.

CUSTOM LOCAL AREA SIGNALING SERVICES

B. DEFINITIONS OF FEATURE OFFERINGS (Continued)

a. Sequential Hunting

(N)

Hunting starts with the line associated with the called directory number and ends when the call is completed to an idle line or when the last line of the hunt group is reached, whichever occurs first.

b. Circular Hunting

Hunting starts with the line associated with the dialed directory number of the hunt group and continues until all lines of the hunt group are searched once or the call is completed to an idle line, whichever occurs first.

c. First Hunting

Hunting starts with the first line in the hunt group regardless of the directory number dialed and continues to the end of the hunt group or until the call is completed to an idle line, whichever occurs first.

d. Distributed Hunting

Hunting commences at the most idle line in the group which follows the last line to which a call was completed and continues over all lines in the hunt group until all the lines are covered once or the call is completed to an idle line, whichever occurs first. Distributed hunting is normally used when equal call distribution is required.

Once an overflow condition results (that is, a call arrives at the end of the hunting sequence without completing to an idle line), the call may be routed to a busy tone, a recorded announcement, or an overflow directory number that is not part of a hunt group

17. Deny Originating (DOR)

Deny Originating is an originating Call Management Service that allows a subscriber the option of denying all originating calls from a line with the Deny Originating feature on it. An announcement will be returned to the subscriber if he/she attempts to place an outgoing call informing him/her that the call can not be processed. Terminating call are not affected by the DOR option.

CUSTOM LOCAL AREA SIGNALING SERVICES

B. DEFINITIONS OF FEATURE OFFERINGS (Continued)

18. Deny Terminating (DTM)

Deny terminating is a terminating Call Management Service that allows a subscriber the option of denying all terminating calls to a line with the Deny Terminating feature on it. An announcement will be returned to the calling directory number informing the caller that the directory number dialed is not receiving calls. Originating calls are not affected by the DTM option.

(N)

19. Manual Line (MAN)

Manual Line is an originating Call Management Service that allows a subscriber the option of sending all calls originated by a station to automatically be routed to the operator. This feature is used primarily for inmate type services. However, it may also be used on single party residential and business lines as a station option, where the subscriber is physically impaired from dialing a directory number.

20. Toll Denied (TDN)

Toll Denied is an originating Call Management Service which restricts a station from originating all toll call types, 1+, 0+, 011, and 01. When the option is applied to a subscriber station, no toll calls can be generated from that station. Local calls and all terminating traffic to the station are unaffected.

21. No Receiver Off-Hook (NRH)

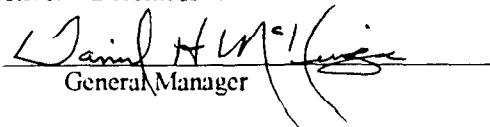

No Receiver Off-Hook is an originating Call Management Service that allows a subscriber to place his/her receiver off-hook for extend periods and eliminate the receiver off-hook tone. When a subscribers phone is placed off hook and has the NRH option, if no digits are dialed within 30 seconds the station will time out to an announcement. The announcement is repeated twice and the phone is then placed in lockout. Without the NRH option, following the second announcement, Receiver Off-Hook (RCH) tone is applied for 30 seconds before the station is placed in lockout. Terminating calls are not affected by the NRH option.

B. DEFINITIONS OF FEATURE OFFERINGS (Continued)

22. TWX

TWX is an originating Call Management Service used whenever a TWX device is connected to the subscriber line. TWX is used as a screening test primarily connected with Equal Access offices where coinless public telephones and Customer Owned Coin Operated Telephones (COCOT) must be specified. The TWX option allows the IC operators to identify these stations as coinless public telephones and COCOTs and to treat them as such. Terminating calls are not affected by the TWX option.

23. Automatic Line (AUT)

Automatic Lines is an originating Call Management Service. Calls originated from this station are automatically routed according to the digits specified by the subscriber. Up to 24 digits can be specified in standard called number format. The digits will be specified by the subscriber to the company at the time the Automatic Line option is requested. These digits are entered along with the Automatic Line option by the Company. The subscriber cannot program these digits from his/her local station. Whenever the subscriber request a change in digits, the change will be made by the company. This feature is used primarily in air port terminals, hotels, motels, and elevators. It may also be used on a single party residential and business lines as a station option where the subscriber is physically impaired from dialing a directory number. Terminating calls are not affected by the AUT option.

24. Special Billing (SPB)

Special Billing in an originating Call Management Services. Toll calls from a directory number with the Special Billing option are billed to another directory number in the same office as the directory number assigned to this station. This feature is used with hunt groups where toll calls are billed to one common directory number in the hunt group and not to all the individual directory numbers in the hunt group. This option may also be used where two or more NXXs are served from a common host office. While this feature is used primarily with hunt groups, it is not restricted solely to the function. Single party residential and businesses with two or more lines may find this feature helpful. Subscribers with directory numbers in two or more NXXs must first check with the company to see if SPB would apply to their directory numbers. Terminating calls are not affected by the SPB option.

25. Intra-LATA Restricted (IRST)

(N)

Intra-LATA Restricted is an originating Call Management Service. When the Intra-LATA Restricted option is applied to a station then that station is restricted to intra-LATA calls only. No inter-LATA calls will be permitted from a station with the IRST option assigned to it. Terminating calls are not effected by the IRST option.

26. Feature Group A (FGA)

a. Feature Group A (Non-Restricted)

Feature Group A Non-Restriction option in an ongoing Call Management Service. This option provides FGA capability without any call type restrictions.

b. Feature Group A (Restricted)

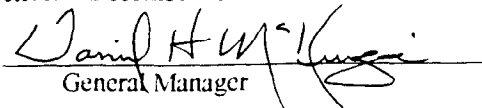

Feature Group A (Restricted) is an originating Call Management Service. This option provides FGA capability with one or all of the following restriction classification.

1. N11 Restricted
2. Restricted 0+ / 0- / 01+
3. 10xx Restricted
4. 950 Restricted

Terminating calls are not affected by the FGA (Non-Restricted) or (Restricted) option.

CUSTOM LOCAL AREA SIGNALING SERVICES

B. DEFINITIONS OF FEATURE OFFERINGS (Continued)

27. Carrier Restricted (CRST)

(N)

Carrier Restricted is an originating Call Management Service. The Carrier Restricted option allows the subscriber to specify a specific carrier to be restricted: associated with Equal Access features Group B and D. This feature allows a subscriber to be restricted from using a specific Inter-LATA or International carrier, represented by a carrier code XXXX.

Up to two (2) carriers may be specified per subscriber line. When the office is configured with Multiple Selective Carrier Denial up to 127 carriers may be specified per subscriber. Multiple Selective Carrier Denial is subject to the availability of facilities and technical limitations and limited to the Company's central office specifically equipped to provide the service. Terminating traffic is not affected by the CRST option.

28. User Transfer (UTF)

a. Residential User Transfer

Residential User Transfer is an originating Call Management Service. Residential User Transfer allows the user to transfer an established call to another line. Residential User Transfer requires the subscriber station to have Three Way Calling. The transferring party is billed for the charges the transferring party originated.

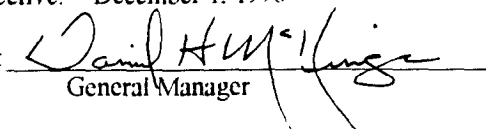

b. IBS/EBS Centrex User Transfer

IBS/EBS Centrex User Transfer like Residential User Transfer is an originating Call Management Service for IBS and EBS Centrex Users. The IBS/EBS Centrex User Transfer allows an originating Centrex station to transfer an established call to another line. The transferring party is billed for charges the transferring party originated.

CUSTOM LOCAL AREA SIGNALING SERVICES

B. DEFINITIONS OF FEATURE OFFERINGS (Continued)

29. Warm Line (WARM)

a. Residential Warm Line

Warm Line is an originating Call Management Service. Warm line is an automatic line feature which allows the subscriber a specific amount of time to dial a directory number before it automatically dials a pre-designated number. This allows the subscriber to use the telephone normally, but to go to a designated number simply by staying off-hook. This may be important for example, for immediate access to emergency numbers in the case of sick or elderly individuals needing help but unable to dial a telephone number.

Warm Line provides a subscriber station with 30 seconds of dial tone before automatically routing to a specified terminating number. The company will program in the destination directory number at the same time as installing the Warm Line option. Up to 24 digits can be specified in standard called number format. The subscriber can not program these digits from his/her local station. Whenever the subscriber request a change in digits, the change will be made by the company.

b. IBS/EBS Centrex Warm Line

IBS/EBS Centrex Warm Line like Residential Warm Line is an originating Call management services for IBS and EBS Centrex users. Like the residential Warm line, the subscriber must provide the Company with all the digits to be dialed from the IBS/EBS station.

30. Teen Line (TEEN)

Teen Line is a terminating Call Management Service. Teen Line enables two directory numbers to be assigned to a single-party line. Each directory number is assigned a unique ringing pattern so the called party can determine the nature of the call. This feature has broad applications for families, home businesses, and small businesses. Families can have one number for the parents and another for the children. Home businesses can have one number for the business and another for the residence. Small businesses can distinguish the type of call being received, for example, a service versus an order placement.

CUSTOM LOCAL AREA SIGNALING SERVICES

B. DEFINITIONS OF FEATURE OFFERINGS (Continued)

Subscribers who also have the Call Waiting feature assigned to their line will receive a distinctive Call Waiting tone for each telephone number. Subscribers who also have Call Forward assigned to their line have two options: (1) Both telephone numbers can be forwarded when Call Forward is activated- with this arrangement, the forwarded-to number must be the same for both telephone numbers. (2) Only the main or "master" telephone number can be forwarded when Call Forward is activated-with this arrangement, the additional or "dependent" telephone number will continue to ring and can be answered at the subscriber's premises while the master number has been forwarded.

(N)

31. E911 Remote Station (E911)

E911 Remote Station is a terminating Call Management Service. The E911 option is designed for use with RLCM and RSLE remotes. This feature defines which station will be accessed when the remote switch is in Emergency Stand Alone (ESA) mode and 911 is dialed. Only one station per remote switch may have the E911 option.

This service is only available upon request to the following entities and their employees/volunteers, for lines over which the official business of the agency is conducted, including those at the residences of employees/volunteers where the head of the agency certifies to Telephone Company management a need for E911 upon health and safety concerns: (a) Nonprofit, tax exempt, E911 agencies such as Emergency Rescue Squads, volunteer fireman, etc. (b) federal, state, local disaster response personnel and local law enforcement agencies.

32. 900 Restriction (!900)

900 Restriction is an originating Call Management Service which restricts a subscribers station from placing any originating 900 type calls. An announcement will be returned to the subscriber if he/she attempts to place a 900 type call informing him/her that the call can not be processed. Terminating calls are not affected by the !900 option.

33. International Restriction (!011)

(N)

International Restriction is an originating Call Management Service which restricts a subscribers station from placing any originating International calls (01 and 011). An announcement will be returned to the subscriber if he/she attempts to place an International type call informing him/her that the call can not be processed. Terminating calls are not affected by the !011 option.

34. Fixed Call Forwarding (RCFA)

a. Fixed Call Forwarding Local (FCF)

Fixed Call Forwarding Local is a terminating and an originating Call Management Service. This feature is useful if a residential or business has changed locations (from on exchange to another) but their telephone number is published in the directories. It allows the switch to forward all calls coming in to the old number to the new number without utilizing two line cards. The forward-to number is applied against the old directory number by the Company and any changes in the forward-to number may be changed by the Company.

b. Fixed Call Forwarding Toll (FCF)

Fixed Call Forwarding toll is a terminating and an originating Call Management Service. This feature intercepts and directs calls from a local directory number to a toll location, with the called party receiving billing for the call. For example, a business with clientele in City A, but located in City B, can have local calls made to its business, which would otherwise be a toll call. The forward-to number is applied against the old directory number by the Company and any changes in the forward-to number must be changed by the Company.

35. Nailed-Up Connections

Nailed-Up Connections is a terminating and an originating Call Management Service. This feature allows a permanent connection between two ports for special service applications such as: billing information for hotel/motel services, tie lines for PBX and Centrex users, etc.. Connections can be nailed trunk - to - trunk or line - to - line.

B. DEFINITIONS OF FEATURE OFFERINGS (Continued)

36. Ring Again (RAG)

(N)

Ring Again is an originating Call Management Service. This feature allows a station user encountering a busy station within the switch to be notified when the busy station becomes idle and to be placed automatically in a ring-again mode.

When a station user encounters a busy tone from another station, the user flashes the switchhook to activate Ring Again. Upon hearing a special dial tone, the user dials the Ring Again feature code. When confirmation tone is heard, the user places the handset on-hook. The user is free to place or receive calls normally. When the busy station becomes idle, the user at the calling station is alerted by a ring-again signal. When the user who activated Ring Again answers the signal by going off-hook, the switch places the call.

The calling station can deactivate the Ring Again request by going off-hook and dialing the Ring Again feature code. Confirmation tone is given. Ring again is automatically deactivated if the calling station does not answer the ring-again recall timer times out. The Ring Again Recall timer is set for 20 seconds.

A station can have no more than one Ring Again request active against another station at any particular time. If a station with an active Ring Again request calls another busy station and activates Ring Again against the new busy station, the new Ring Again request overwrites the old request. A busy station may have more than one Ring Again request active against it simultaneously (several other users trying to call a single busy line), to a maximum of 15. In this case, the Ring Again requests are served in the order in which they were activated (Ring Again queue – first in, first out).

37. Ring Again Denied (RAGD)

Ring Again Denied is a terminating Call Management Service. Ring Again Denied is a station option that prevents other subscribers from leaving Ring Again request against a station.

38. Call Forward, Remote Access (CFRA)

Call Forward, Remote Access is a terminating and an originating Call Management Service. Call Forward, Remote Access allows business or residential subscribers to activate or deactivate the Call Forward option on their telephone from a local or toll remote station. This is accomplished by dialing a dedicated base directory number, your own seven-digit directory number, followed by a Personal Identification Number (PIN), and the activation /deactivation codes. This feature is available to residential and business end-users and is compatible with normal Call Forwarding. It requires the use of Dual Tone Multifrequency (DTMF) dialing at the remote station.

(N)  
|  
(N)

39. Calling Name/Number on Call Waiting (Caller ID Plus)

This feature, when used in conjunction with call waiting and calling name/number delivery, will allow the user to see the name/number (where available), of the call waiting party.

C. REGULATIONS AND LIMITATIONS OF SERVICE

1. Limitations

- a. The services are provided subject to the availability of facilities and technical limitations and limited to the Company's central offices specifically equipped to provide such service. Also, feature screening list can only contain telephone numbers of subscribers served out of the Company's properly equipped offices.
- b. CLASS features are available to single party resident and business customers who have rotary dial or touch tone service.
- c. CLASS features will not be provisioned on company provided public and semi-public telephone service.
- d. CLASS features are not available on any Private Branch Exchange System or Key System, unless the hardware and software of this CPE is provisioned to support the CLASS features as described in this tariff.

B. DEFINITIONS OF FEATURE OFFERINGS (Continued)

- e. Operator assisted calls are designed to override the feature calls for emergency purposes.
- f. CLASS features are not available for tie trunks, i.e. business groups that exist in multiple offices interconnected by tie trunks.
- g. Calling Number Delivery Blocking – Per Line is available upon request, at no charge, as set forth in B.4.b of this tariff.
- h. The Company will deliver all numbers, subject to technical limitations, including telephone numbers associated with Non-Published listing Service as described in Section F.15. of this tariff.
- i. The Company shall not be liable to any person for damages of any nature or kind arising out of, or resulting from, or in connection with the provision of these services, including without limitation, the delivery or non-delivery of calling numbers.
- j. Telephone numbers transmitted via Calling Number Delivery as described in B.s previously, are intended solely for the use of the Calling Number/Name Delivery subscriber. Resale of this information is prohibited by this tariff.

PRIVATE LINE SERVICES

T.1 Concurrence

T.1.1 Mountain Rural Telephone Cooperative Incorporated hereinafter called the concurring utility, except as specifically stated herein, assents to, adopts and concurs in the Special Access Service Tariff filed with the Kentucky Public Service Commission by Duo County Telephone Cooperative, Corp., Inc., for Intrastate Interlata Intercompany Special Access Service furnished by the concurring utility (including such service as is also participated in by one or more other utilities), and hereby makes itself a party thereto and obligates itself to observe each and every provision thereof.

T.1.2 Mountain Rural Telephone Cooperative Corp., Inc. concurs in the rates, rules and regulations governing Intralata Private Line Service as filed by South Central Bell in its PSC KY Tariff No. 2B and General Telephone Company in its PSC KY Tariff No. 2B. Mountain Rural's concurrence is by individual circuit governed by which company (South Central Bell or GTE) bills the circuit. This concurrence is for intercompany circuits only.

T.2 Exceptions

T.2.1 Customer provided terminal equipment on customer provided communications system attached or connected to facilities of the concurring utility and permitted to be used under this Tariff, may not be used for local exchange service of this concurring utility, unless there is compliance with provisions of the Tariff of this concurring utility.

T.2.2 Mountain Rural Telephone Cooperative Incorporated concurrence with the issuing utility is limited to private line circuits, that connect with the issuing utility or other connecting companies.

T.2.3 When private line circuits are provided solely on the facilities of Mountain Rural Telephone Cooperative Incorporated the charges specified in paragraph T.3, will apply. These charges are based on a single pair of wire. In cases where one circuit requires multiple pairs, the charges in paragraph T.3 will apply to each pair of wires used in the circuit.

GENERAL SUBSCRIBER SERVICES TARIFF

Mountain Rural Telephone  
Cooperative

Section T  
First Revised Sheet 3

T.2.4 Mountain Rural Telephone Cooperative Incorporated will also charge a termination fee at the rate specified in paragraph T.3. A termination is defined as each premise appearance of the cable pair. Where multiple pairs are provided to provide one circuit, a termination charge will be applied to each premise appearance of each pair of wire.

T.2.5 The minimum service period on private line service is six months. A termination agreement will be required concerning the cost of installation of the service. This termination agreement will apply to private line services served solely by Mountain Rural Telephone Cooperative Incorporated and those served jointly with connecting companies. Service will not be initiated until the termination agreement is in the possession of the company.

T.3 Monthly Charges

T.3.1 Each pair will be charged at the rate of \$3.00 for the first quarter mile, and \$ .75 for each quarter mile or fraction of a quarter mile thereafter. The measurement of distance will be made in route mileage.

T.3.2 Each termination of each pair will be charged at the rate of \$1.75 per termination.

T.4 Definition and Limitation of Service

T.4.1 A private line circuit is defined as a pair or pairs of wire provided by the company, for the private use of its customers. These circuits function without connection to local exchanges switching equipment of the company.

T.4.2 Examples of circuits used for this purpose and provided by the company are:

T.4.2.1 Circuits used for the transmission of data information.

T.4.2.2 Circuits used by banks and others for alarm purposes.

T.4.2.3 Circuits used for voice transmission between two or more points, which function separate from local exchange equipment.

PUBLIC SERVICE OF KENTUCKY

~~T.4.2.4~~ Circuits provided as a vehicle to transmit radio signals e.g., to connect city and county police and fire station.

CATV POLE ATTACHMENT TARIFFS

W.1 General

(L)

The Mountain Rural Telephone Cooperative Corporation, Inc. will make available to CATV Systems space on the poles of Mountain Rural Telephone Cooperative. This space is subject to the following conditions and limitations which they or appropriate regulatory body deem to be in the interest of the telephone using public. The CATV system shall be considered to be a customer or subscriber of Mountain Rural Telephone Cooperative and shall be subject to other parts and sections of this Tariff.

1. Before making attachment to any pole or poles of the telephone company, CATV shall make application and receive a permit. Before a permit can be issued the telephone company may impose a bonding or insurance requirement to assure safe and adequate construction and operating practices on the part of the CATV operator.
2. The application for permit shall consist of drawings and associated descriptive matter which shall be adequate in all detail to enable the telephone company to thoroughly check the proposed installation of the CATV operator.
3. When the application for a permit requires the telephone company to do any work to make room for the CATV facilities on the telephone company's poles, the CATV operator will reimburse the telephone company for the entire nonbetterment portion of the cost and expense thereof, including the walk through inspection, engineering, staking, the cost of the larger poles, sacrificed life value of poles removed, cost of removal and the expense of transferring telephone company's facilities from the old to the new poles, less salvage value of original facilities.
4. Where CATV's desired attachments can be accommodated on present poles of the telephone company by rearranging telephone company facilities thereon, the CATV operator will compensate the telephone company for full expense incurred in completing such rearrangements. The CATV operator will also reimburse the owner or owners of other facilities attached to said poles for any expenses incurred by it or them in transferring or rearranging said facilities.

Original Sheet 3

W.1 General (continued)

5. The CATV operator will reimburse the telephone company for any authorized expense within ten (10) days after receipt of the telephone company's invoice for such expenses.
6. This tariff applies to CATV operators only. This tariff is not applicable to any other individual, firm or corporation.
7. The CATV operator will provide and keep in effect, by an insurance company authorized to do business in the Commonwealth of Kentucky, the following:
  - a. Insurance protection for its employees to the extent required by Workmen's Compensation Law of Kentucky.
  - b. Public liability insurance with coverage for any town, city or area in which the CATV operator operates under this tariff to a minimum amount of \$200,000.00 for each person and \$500,000.00 for each accident for personal injury or death, and \$100,000.00 as to the property of any one person, and \$200,000.00 as to any one accident for property damage. Before beginning operations under this tariff, the CATV operator shall cause to be furnished to the telephone company a certificate from such insurance company evidencing the existence of such insurance.
8. Should the work load of telephone company crews become so great that a choice had to be made where to do "make ready" work for the CATV operator or do work to provide telephone service, the telephone company reserves the right to do telephone related work first.
9. Mountain Rural Telephone Cooperative makes no provisions to rent conduit space to CATV operators.

W.2 Construction and Maintenance

(L)

1. The CATV operator's cables, wires and appliances, in each and every location, shall be erected and maintained in accordance with the requirements and specification of the National Electrical Safety Code, 1987 Edition, or any amendments or revisions of said code and in compliance with any other codes, rules or orders now in effect or that hereafter be issued by the Public Service Commission or other authority having jurisdiction.

W.2 Construction and Maintenance (continued)

2. The CATV operator shall place its wires, cables and appliances not less than one (1) foot ABOVE existing telephone facilities.
3. The CATV operator shall at its own expense, make and maintain attachments in a safe condition and in thorough repair, and in a manner suitable to the telephone company, or by other persons, firms, corporations, governmental units, etc., using said poles, pursuant to any license or permit of the telephone company, or interfere with the working use of facilities there or which may, from time to time, be placed thereon.
4. The CATV operator shall at any time, at its own expense, upon forty-eight (48) hour notice from the telephone company relocate, replace or renew its facilities placed on said poles, and transfer them to substituted poles, or perform any other work in connection with said facilities that may be required by the telephone company. In cases of an emergency situation, immediate action may be required of the CATV operator without the forty-eight (48) hour notice.
5. If the CATV operator is unable or unwilling to meet the telephone company's time schedule for such changes, the telephone company may do the work and charge the CATV operator its reasonable cost for performing the change of CATV attachments.
6. In case of broken or damaged poles, the telephone company shall be required or expected to clear traveled portions of public highways, or private property of CATV wires and cables.
7. To prevent lightning damage and to promote safety, the last company installing a support messenger on a pole shall bond to the existing support messenger of the other company. This bonding requirement will be at least once every fifteen hundred (1500) feet of messenger length.
8. The telephone company reserves to itself, its successors and assigns, the right to maintain its poles and to operate its facilities thereon in such manner as will, in its judgement, best enable it to fulfill its own service requirements. Except in the case of willful negligence, the telephone company shall not be liable to CATV operator for any interruption to service of the CATV operator or for interference with the operation of the cables, wires and appliances of the CATV operator arising in any manner out of the use of telephone company poles.

W.2 Construction and Maintenance (continued)

9. The CATV operator shall submit to the telephone company evidence, satisfactory to the telephone company, of the CATV operator's authority to erect and maintain its facilities within public streets, highways, and other thoroughfares within the territory which is to be served and shall secure any necessary consent by way of easement franchise or other satisfactory license, permit or authority acceptable to the telephone company from State, County or Municipal authorities or the owners of property where necessary to construct and maintain facilities at the location of poles of the telephone company which it desires to use. The CATV operator shall at its cost and expense, compensate or otherwise satisfy or compromise the claim of any person or entity that may claim CATV operator's facility constitutes an additional servitude.
10. The telephone company, because of the importance of its services, reserves the right to inspect each new installation of the CATV operator on its poles and in the vicinity of its lines or equipment and to make periodic inspections, as plant conditions warrant, of the entire plant of the CATV operator. The original inspection shall be on a per cost basis and there shall be no cost for the periodic inspection.
11. When substandard installations are found which are not created by the telephone company but by the CATV operator, the telephone company will charge the CATV operator for cost of correcting them.
12. The CATV operator shall not attach to any pole hardware of the telephone company for supporting of any CATV wires or cables.
13. The CATV operator shall not attach to any anchor of the telephone company. If additional guying is required due to CATV facilities the CATV operator must install an additional anchor along with the new guying.
14. If the telephone company removes all of its facilities from a pole, the CATV operator shall be required to purchase that pole at book value cost, or to erect its own pole, which will then allow the telephone company to remove its pole.

W.3 Rates

(L)

1. Since it has been determined by the Commission that the CATV operator is a customer of the telephone company, they (the CATV operator) shall be billed like other customers of the telephone company. The CATV operator shall be billed per month and subject to the same penalties as other customers of the telephone company.
2. The CATV operator shall report to the telephone company each month the number of new attachments and the number of attachments removed. A service ordering charge (as shown elsewhere in this tariff) shall be applicable for adding new attachments the same as any other customer would be charged for adding new equipment.
3. Any attachment found not reported will be considered to have been installed the new day after the last inspection and a back bill of two times the monthly rate will be rendered. Any "make ready" work required for attachments not reported will be billed two times the actual cost.
4. A two-user pole is a pole used by the telephone company and one or more CATV operators. With each CATV operator paying a two-user rate.
5. A three-user pole is a pole used by the telephone company, a power company, and one or more CATV operators with each CATV operator paying a three-user rate.
6. The following rates shall apply per year:
  - a. two-user pole \$3.00 per year
  - b. three-user pole \$2.50 per year

W.4 Non Payment

1. The CATV operator's late payment or non-payment of bill will be handled in the following manner:
  - a. The standard form late notice will be mailed at this time.
  - b. If after five (5) days from date late notice is mailed the bill is still unpaid, a representative of the telephone company will be dispatched to the local office of the CATV operator to collect the bill.
  - c. If there is no local office of the CATV operator, a registered letter will be mailed to the regular billing address.
  - d. If the bill is still unpaid, this same procedure will be repeated each month with all late charges and collection charges accumulating until four (4) months has elapsed.
  - e. At the end of the four (4) months, a thirty (30) day written notice will be sent to the Public Service Commission by registered mail, with a copy to the CATV operator.
  - f. At the end of thirty (30) days, if the bill is still unpaid, the telephone company will remove all of the CATV operator's wires, cables and appliances from the poles of the telephone company with the removal cost being added to the CATV operator's final bill.

NUISANCE CALL INVESTIGATION

1. Nuisance Call Investigation is generally determined to be a public service offering and may be provided, where switching facilities permit, to the public to insure its well-being and safety.
2. The duration of a nuisance call investigation is generally limited to a 7-day period but may be extended if deemed necessary to further protect the public's well-being and safety.
3. The telephone company must conform to all local, county, state, and federal laws applying to nuisance call investigations, and the delivering of results thereof.
4. Generally, a nuisance call investigation request must be initiated jointly by the governing law enforcement agency and customer in a document conforming to the local, county, state or federal law. Furthermore, the party requesting such an investigation must express in writing his willingness to prosecute whenever possible.
5. Results of nuisance call investigations are limited to the identification of the line and not the party originating the call; and said results will only be submitted to the law enforcement agency originating the request.
6. The following charges will be collected at the time the request is made:

a. Installation and removal of Equipment	\$17.50
b. Tracing Charge	12.50
Total	<u>\$30.00</u>
